

I want meat
Not chocolate! !!!

Veterinaire Klinieken Aruba NEWSLETTER

2010, July 1, No. 9

What on earth
are you talking
about?

In this quarterly newsletter we have selected some topics about our clinics or your pets that may be of interest to you. You can also receive this newsletter via email. Just visit our website at www.arubavets.com

Heartguard plus is back!

GREAT NEWS! As of August 1st we will be able to serve your dog the **tasty beefy chewables** again. For reasons beyond our control since 2009 we could only import the Indian made generic Heart Care . We received lots of complaints about these chocolate flavored chunks: most dogs refused to take them and consequently drove owners crazy . But with **meat flavored Heartguard** heartworm prevention will be a delight instead of a torture. **Bonne appétit !**

Hello

Stephanie Begeemann

Zayenne

This month **Dr. Tamara Kleijwegt** is going to try and leave VKA for a 2nd time. Tamara joined us in 2004. In 2006 she headed "home" again but the infamous "in-between-cultures-syndrom" prompted her to come to Aruba for a 2nd term. Probably afraid of coming back a 3rd time Tamara is off to Australia this time. We thank her for 5 years of quality veterinary work at VKA, and wish her the very best for the future. Taking her place is Belgian educated Dutch national **Dr. Stephanie Begeemann**. Also back for a 2nd term is **Zayenne Oduber**. We are very happy to welcome her as a front desk assistant in Wayaca.

Tamara Kleijwegt

Aruban Adiella Adamus and Lisa Hoogveld are apprentices from Helicon Vet Tech education in Holland

Goodbye

Giving birth

Dr. Roelie Schrijnders
in action performing a
caesarian section

Dogs and cats usually give birth without much problem. Sometimes however we need to give nature a helping hand. An anemic mother, a single and therefore bigger puppy, some broad headed breed can be the reason for intervention by your vet. If an injection does not do the job a timely caesarean section is necessary to save the mother and the puppies

The surgically delivered
puppies often need to be
resuscitated
